EDUCATION

Presidency University,   Banglore, India
BTech Computer Science & Engineering   *2023 – 2027*

EXPERIENCE

Full Stack Developer Intern   July 2025 – Present
Armstrong Dematic LTD - Nashik, Maharashtra

- Developed a full-stack Software for resource planning providing a centralized platform for scheduling, visualising and tracking technicians.
- Implemented a RBAC authentication system for various user roles and developed a RESTful API with Next.js API Routes that interacts with a relational database schema, managed by Prisma and Postgresql, to perform CRUD operations.
- Developed a AI agent to generate ISO-compliant SOPs, policies, and process flow documents to generate reports.
- Automated end-to-end document creation by programmatically analyzing ISO branding guidelines and integrating company-specific branding assets, which generates audit-ready reports with minimal human intervention.

Bug Bounty   April 2025
Spotify Bug Bounty Program   *Remote*

- Vulnerability Reported: Subdomain Takeover via Unclaimed Fastly Service.
- Discovered an unclaimed Fastly CDN configuration on Spotify's subdomain, leading to a high-severity subdomain takeover vulnerability.
- HTTP header injection to confirm the domain pointed to d.sni.global.fastly.net without any active Fastly service.

PROJECTS

BoreConnect | *Java, SprintBoot, WebSocket, JavaScript*   Project Link

- Simple Network tunneling tool that helps expose local servers to the internet.
- Implemented real-time communication using WebSocket to stream live process output and status updates to users.
- Enables users to host live demos, share local directories, and organize watch parties by tunneling local servers to the internet

Nyaya Niti Predict | *React, TypeScript, Next.js, openjustice-in/ecourts library*   Project Link

- Developed a AI-powered legal prediction tool that aims to analyze and predict the outcomes of Indian court cases based on the historical data.
- Engineered data pipeline using eCourts API (openjustice-in/ecourts library) to fetch and process 10,000+ case records.
- Developed APIs with FastAPI to serve predictions and metadata for frontend integration.

TECHNICAL SKILLS

Bash: Proficient in bash scripting with the ability to make shell scripts.
Linux: Comfortable with Linux administration, setting up servers and running tests and System configuration.
Languages: Typescript, Java, C, SQL (Postgres),
Frameworks: React, Next.js, , Jupyter, FastAPI
Tools: Git, Docker, Zsh, Vim, Nmap, OWASP ZAP, nslookup, curl
